\n[20:32:07] <defender> that you sent me \n[20:32:13] <defender> urgently \n[22:12:21] <dgh> Sec
\n[22:12:30] <dgh> And you didn't save \n[22:12:38] <dgh> I worked for 8 hours.\n[22:14:15] <defender>
there pass \n[22:14:19] <defender> I wrote to you!\n[22:14:27] <defender> dawaf don't link to the watch
\n[22:14:33] <defender> otherwise I'll link \n[22:14:52] <defender> if you want to go on vacation, let's
finish all the questions \n[22:18:17] <dgh> I see that you are starting to push, and to be honest, I don't
like it.\nI sent you the file and the password to it. that is, what depends on me moreover, about the
vacation, I wrote in advance that what is happening now is not only my fault, and that I depend on me

I do.\nIf you want to put pressure on me and think that I will work better from this, you are wrong.
 \n[22:29:37] <dgh> https://file.io/aFft29MLJJvM\nsffsgpcXGH!@\$ \n[22:30:57] <dgh> Got it?\nIf you intend to keep me out of vacation, if something is not let's finish it, but I suspect that this might be better immediately create a conf with a booze and let's discuss this moment\nI will buy tickets and I won't redo anything if something goes wrong \n[22:32:26]
 <dgh> And in the end, I'll just go no matter what happens, I want it too much. I don't want more trouble. But and I'm not ready to accept some incomprehensible conditions.\nThere is a list of tasks, I'm ready to implement it and I'm doing it, we agreed on it. \n[22:33:13] <dgh> Everything above is not only my responsibility\nBut at least yours, Buza, and Nikolos \n[22:33:24] <dgh> I take my share and what I can do. \n[22:34:50] <dgh> I won't do more than I can anyway, if the conversations continue in this tone, it doesn't suit me.\nAgain, if you want to put pressure on me like that, let's discuss it. And either look for someone else as you wanted, or let's negotiate. I was very tired and I also hesitated that nothing was working."

Ready to issue the assembly as a dll. You only need two things: \n1) you need to find out for which bot dll, i.e. what entry point to make there (with what it will be launched) \n2) you need a server, the previous one is not paid for (or I see the wrong version), in general, you need to order it again, we can order it and deploy it, but you need confirmation\nFor exe it's almost the same. But for dll - you need to know how to make the entry points in the dll correctly" } {
